MILOŠ MRKAJIĆ

DATA ANALYST

E-Mail: milos.mrkajic3@gmail.com   Phone number: 061-616-1992   Place: Novi Sad, Serbia

I am an experienced Data Analyst working with hands-on projects. Using state-of-the art programming tools and techniques, my purpose is to help companies to solve problems and make better decisions. With the ability to clean, manage, examine and present data in a way that helps businesses to excel on another level.

Professional skills

Tableu

- Used for visualization and analysis. In order to understand data, a smart step is first to see it. With Tableu exploring data is practical and fast, which leads to discovering useful insights.
- Hands-on projects in a variety of fields, primarily in economics: meat production, sports analysis, airways reviews, Airbnb, etc.
- Knowledge to understand tasks, to ask the right questions, to use proper charts depending on what questions am I trying to answer, an ability to tell a story or a report in a clear and concise way.

MySQL

- Used to create databases. To create and manage datasets, on which later to perform analysis. To create, insert, update, and delete data. For cleaning large datasets, so they could be used in the next steps of data analysis..

Excel

- Microsoft Excel enables you to format, organize and calculate data in a spreadsheet. The tool is also used in operations management and producing performance reports. It makes it easier to view newly added data and perform data cleaning and analysis.

Additional technical skills: Python basics, Pandas, Matplotlib, Seaborn.

Soft skills

- Critical thinking, problem solving oriented, eye to detail, curiosity and eagerness always to learn new tools and techniques, very friendly and communicative, responsible, adaptable..

Education

-Language high school in Sremski Karlovci
2011-2015

-History student at the Phaculty of Philosophy in Novi Sad
2015-
